★★★★☆ (4-1/2 stars)

Buy this CD if:

- *You are a coach and want to gain some advanced asking skills*
- *You want your clients to gain insightful perspective on their dreams, conflict and major decisions*

On this enhanced CD, Tony does an outstanding job of giving perspective a fresh definition by explaining it in terms of objectivity, context, objectivity and clarity. These four aspects give coaches tools to help clients to process their dreams, conflicts or major decisions in multiple ways. This come-along-side approach can help clients understand their particular challenge and gain a deeper understanding of the circumstances they face in many different ways:

- In relation to other things in their lives
- With another perspective outside of themselves
- From multiple viewpoints

A plus on the CD is the demonstration of perspective. This is accomplished by Tony coaching men and women who are facing real life challenges, whether it is a dream for their life, a conflict he or she doesn't know how to resolve, or a major decision looming where the individual doesn't have clear direction. The live demos give you an opportunity to easily understand the process of helping clients see things from different perspectives. Very effective!

The CD includes helpful transcriptions of all the questions in the coaching demo and handouts with sample perspective questions and outlines of the techniques that you can use as a coach. The versatility of CD as a listening tool yet providing handouts by popping the CD into the computer was a bonus!

Summary

This CD is for any coach who wants a skill building tool to increase effectiveness in helping clients get perspective on their lives. I believe it is a must for your coaching library.
